 Portfolio  GitHub  LinkedIn

Technical Summary :

- **5+ years** of experience in Frontend Development with **React.js, JavaScript**, UI Development, and working knowledge of **Node.js, Express.js & PostgreSQL**.
- Built & Shipped **Microsoft Edge Immersive SoftFRE ([edge://customize](https://www.microsoft.com/edge/customize))**, Achieved **<1.8s FCP, <2.5s LCP**, and **24 ms INP** via code optimizations.
- Strong expertise in **React.js** with **Redux / Redux Toolkit & React Native**.
- Proficient in **JavaScript, HTML5, CSS3, SASS, Tailwind CSS**, & responsive design
- Implemented **SPA routing** using **React Router**
- Integrated REST APIs using **Fetch API** and **Axios**
- Applied **WCAG accessibility standards** to build inclusive user interfaces.
- Skilled in **Chrome DevTools, Redux DevTools**, and browser debugging
- Developed **custom UI animations** to improve user engagement
- Improved application performance through **lazy loading** and **code splitting**
- Performed **cross-browser testing** and resolved compatibility issues
- Working knowledge of Jest, React Testing Library, and Playwright for unit, component, and end-to-end testing

Technical Skills :

Technologies	JavaScript (ES6+), React 19, Redux ToolKit, React Router, Axios, React Native & Node.js, Express.js, PostgreSQL, REST APIs & Webhooks
UI Technologies	HTML5, CSS3, Tailwind CSS, Sass, Accessibility (WCAG), Web Components, Microsoft Fluent UI & FAST Elements.
Testing	Jest, React Testing Library & Playwright
Authentication & Cloud Services	JWT, MSAL (Microsoft Authentication Library), Firebase Authentication, Firebase Cloud Firestore
Version Control & IDEs	Git, GitHub & Azure Repos VS Code & Antigravity IDE

Education :

- B-Tech in Computer science & Engineering from JNTUH (Jawaharlal Nehru Technological University Hyderabad) from Year 2016 - 2021

Work History :

- Working at CognitivZen Technologies as Frontend Developer from Apr 2024-Present (On-site vendor engagement at Microsoft for 18 months)
- Worked at Spring Infotech Pvt Ltd as Frontend Developer from Mar 2021 to Mar 2024

Professional Experience :

Project #1 – Microsoft Edge Browser (ImmersiveSoftFRE) | Microsoft

Role: Frontend Developer / Design Engineer

Environment : Markup First Architecture, Web Components, Fluent UI, HTML5, CSS3, JavaScript, TypeScript

Built and shipped **Microsoft Edge First Run Experience (FRE)** from the ground up, enabling theme selection, layout customization, site pinning, and AI-powered theme generation via [edge://customize](#).

- Developed **reusable Web Components** and integrated REST APIs for user preferences.
- Achieved **<1.8s FCP**, **<2.5s LCP**, and **24 ms INP** via code optimizations.
- Implemented **UI animations, responsive design, and accessibility**.
- Collaborated with **UI/UX and QA teams** to resolve cross-browser and accessibility issues.

Project #2 – Bing Sports Segment | Microsoft

Role: Frontend Developer / Design Engineer

Environment: React.js, TypeScript, CSS3/SASS

Enhanced the **Bing Sports standings UI** with optimized performance and smooth gradient animations.

- Optimized the **sports table header** for performance and animation.
- Implemented a **dynamic gradient header** based on UI specifications.
- Ensured **responsive design, accessibility, and cross-device compatibility**.

Project #3 – DataZen Analytics Platform | CognitivZen

Role: Full Stack Developer

Environment: React.js, Node.js, Express.js, TypeScript, PostgreSQL, Docker, Apache Superset, Webhooks

Built an **AI-driven Analytics & Reporting Platform** for natural language queries, real-time analytics, and data visualization.

- Developed **React analytics dashboards** with dynamic charts, filters, and data export.
- Built **Node.js services** for asynchronous processing and API rate limiting.
- Implemented secure **token-based authentication** for user login and access management.

Project #4 – Demos Campaign | CognitivZen

Role: Full Stack Developer

Environment: React.js , Node.js, Express.js, TypeScript, PostgreSQL, Webhooks

Built an **Audit Logging system** to track security events, user actions, and campaign changes.

- Developed **Node.js services** for asynchronous event logging.
- Built a **React dashboard** with search, filters, and CSV export.
- Developed **CRUD functionality** for audit logs to manage and track user activities, security events, and campaign changes.

Project #5 – Demos Social App | Using BlueSky | CognitivZen

Role: Frontend Developer

Environment: React Native, TypeScript, Expo, MobX, AT Protocol

Developed a **cross-platform social networking application** for Web, Android, and iOS.

- Developed **reusable UI components** and screens for feeds, profiles, search, notifications, and post creation.
- Integrated AT Protocol APIs for **authentication**, timelines, posts, likes, reposts, and media uploads.
- Implemented responsive navigation and threaded replies while **improving performance** through **lazy loading** and prefetching.
